

# FRANKE DESIGNER CATALOG

2017

MAKE IT WONDERFUL

**FRANKE**

It's easy to be ordinary; to have an ordinary home, filled with things you neither love nor hate. But you should never settle for ordinary and that's why we want to make everything we make wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way; from the first glimpse of carefully considered design, to manufacturing standards that ensures you can feel the quality and craftsmanship of every piece.

This catalogue captures the spirit of wonderful in order to captivate and inspire you. A comprehensive range of sinks, taps, hobs, decorative hoods, kitchen appliance and accessories can help turn an everyday kitchen extraordinary and turn a daily chore into a guilty pleasure.

Let everyone else be ordinary. Let's make it wonderful.

# Introduction

Franke Headquarters in Aarburg, Switzerland

Since 1911, Franke has been known for its dedication to research, development, manufacture and service. Today, it is one of the world's leading suppliers of kitchen sinks, taps, cooking hobs and extractor hoods.

# GLOBAL FOOTPRINT

Aarburg, April 3, 2017, The Franke Group 1 achieved a pleasing increase in sales and significantly improved profitability in 2016, despite a challenging global economy. The sales growth was driven mainly by strong organic growth in the double-digit percentage range. The higher profitability is based on sales rises in practically all of the divisions and on group-wide operating efficiency improvements. Thanks to a solid strategic foundation and additional investments in innovation and employees, the Group was able to gain additional market shares. Furthermore, by reacting more quickly to business opportunities it could strengthen its market position further despite a tough, competitive environment.

**Franke belongs to the Artemis Group and is a world leading provider of solutions and equipment for residential kitchens and bathrooms, public/private washrooms, the professional foodservice sector, and coffee preparation. The Franke Group operates worldwide and employs around 9,000 people in 40 countries, generating sales of over CHF 2.0 billion.**

# ADVANTAGE FRANKE - High Grade Materials

## TECTONITE®

Made in The Netherlands.

TECTONITE® is the latest innovation by Franke – made of TECTONITE®, which is a hi-tech, light but strong synthetic material that gives you amazing advantages:

- It is extreme temperature resistant (230-300 degrees)
- It is scratch resistant and has a super smooth and easy to clean texture
- It is resistant to chemicals used in the kitchen (vinegar, tomato sauce, etc.)
- It has a UV resistant coating (its colour will not change)
- It is a 100% recyclable material
- It is available in three high tech colours: carbon black, arctic white and coffee
- It has a five year warranty

## TECTONITE® Technology

### Beautiful and Strong

A great looking and smooth surface, the TECTONITE® material prevents scuffing or scratching. It is also easy to clean and doesn't lose colour.

### 3rd Generation Coating

A new coating called PiMC (Power in Mold Coating) gives a protective layer providing strength to the material and protecting its colour.

### Exclusive Texture

It is finished with an exclusive texture that coats the sink and repels water and dirt to keep the surface looking as good as new.

## AUSTENITIC STAINLESS STEELS (SS 304 - AUSTENITIC GRADE)

All Franke Stainless steel sinks are manufactured using only SS 304 Austenitic grade. Austenitic stainless steel are chromium & nickel containing stainless steel with very low carbon content. Austenitic 304 stainless steels formed through the generous use of austenitizing elements such as nickel, manganese and nitrogen. Chromium content is range of 18% and nickel content in range of 8%. They are non-magnetic but can become slightly magnetic when cold worked. Cold working also enhances their strength. Austenitic stainless steel have mechanical properties over a wide range of temperatures. In addition, these steel are easy to clean, which enhances their use in applications in hygienic and sterile environments.

### 18/10: 18% Chromium and 10% Nickel

This material is used in Neptune

### 18/8: 18% Chromium and 8% Nickel

This material is used in 610/611, 620, 621, 651 and Adrian Series

---

# SUPERIOR FINISHES & PERFORMANCES

---

### Microdecor Finish

The distinctive pattern of Microdecor steel is so light as to be almost invisible, recalling the effect of aluminum and giving the steel a unique, inimitable appearance. Any scratches only damage the tiny convex areas of the surface, while the imperceptible concave zones prevent the formation of visible marks.

### European Satin Finish

Franke uses a unique process of brush polishing on CNC controlled latest technology machine along with special "Franke" ATL-F22 paste that gives product surface a smooth European Satin finish with good aesthetic look. This makes it best suitable for all kitchen applications since it is prone to scratching during daily usages.

---

## Warranty

---

### 25 Year Warranty

All Franke Stainless Steel Sinks are guaranteed for 25 Year against faulty workmanship and material.

### 5 Year Warranty

All Franke Color Sinks are guaranteed for 5 Year against faulty workmanship and material.

### 1 Year Warranty

All Franke Taps, Bio Waste Disposer & Accessories are guaranteed for 1 Year against faulty workmanship and material.

BALI SINK

## FRAGRANITE

Following extensive testing and development, new Fraganite tackles the humble cleaning problem associated with composite sinks. The revolutionary new Fraganite+ technology is now available on all Franke Fraganite and SilkSheen Fraganite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to keep clean.

Kitchens can be a fertile breeding ground for bacteria, mold and mildew, which can lead to material damage and cause unpleasant odours and stains. On unprotected material, bacteria levels can increase every 20 minutes. The integrated Sanitized® protective function in Fraganite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning practices, but helps to keep surfaces clean. Fraganite treated with Sanitized® reduces bacterial odours by 99%. Sanitized® protective function helps to keep sink surfaces clean by reducing the growth of bacterial odours, mold and mildew even between cleanings.

The granite particles bonded together during manufacture are now smaller, creating a smoother, flatter surface, reducing the chances for limescale to build up. It is also far more difficult for residue, food particles and bacteria to accumulate in between the granules, which greatly improves hygiene.

Tested against leading competitors, DuraKleen® Plus comes up trumps on stain resistance. Even after being left to sit on the sink for 18 hours, the toughest stains like beetroot, permanent marker, red wine and iodine can simply be wiped clean away.

## SANITIZED®

With all the foodstuff around in both raw and cooked states and at various stages of the process of cooking, kitchens are an obvious breeding ground for bacteria. Therefore, as an area that's critical to keep clean and bacteria-free, they need special attention to be paid to them.

On unprotected material, bacteria can multiply every 20 minutes and have a seriously adverse effect on hygiene. The possibility of transferring bacteria is also higher on untreated material. Which is why we have designed our Fraganite sinks with an integrated Sanitized® hygiene function. This helps to keep the area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fraganite treated with Sanitized® reduces bacteria and microbe growth by as much as 99%.

Sanitized® also helps to keep the sink surface hygienic and protected from bacteria and microbe growth after and in between normal cleaning cycles. So, all in all, you have an almost-bacteria-free washing-up area.

# FRAGRANITE

Staining agent	Ease of cleaning
Coffee	Cold water
Red wine	Cold water
Olive oil	Cold water
Oven cleaner	Cold water
Ketchup	Cold water
Coca-Cola	Cold water
Silver shine	Cold water
Vinegar	Cold water
Bleach	Cold water
Shoe polish	Cif + hot water
Beetroot	Cold water
Saffron	Cold water
Marker	Cif + hot water + 1 min

Iodine	Cif + hot water + 30sec

## MATERIAL CHART

Fragranite / SilkSheen	
Heat	8
Scratch	9
Impact	8
Stain	8
Repair	4
Hygiene	9
Guarantee	10
<b>Total</b>	<b>56</b>

This chart has been developed by Franke to assist in grading the various materials in terms of their performance characteristics for each category.

It is intended to act as a guide for different requirements: 10 points - the best material tested in this performance category. For example, in our tests Fraganite/SilkSheen scores highly in scratch resistance and hygiene.

## Body Material

Bronze (59-% - 63%), low lead content (0.8 % - 1.6 %) low residue (<1.5%) – gravity casting or low pressure casting.

Most products in the market are sand cased with lots of pinholes and uneven body thickness.

## Electroplating

The thickness of the nickel plating is more than international and European standards and more corrosion resistant than others.

Surface chrome plating thickness for Nickel and Chrome		
Franke	Nickel > 7.5u	Chrome >0.25 u
International Standard	Nickel > 5 u	Chrome > 0.1u
EN 817 / EN 200		

**Cartridge:** German Ceramic Cartridge and Longer Life

**Flexible hose:** Spanish S/S 304 exible hose, pressure resistant and corrosion resistant

**Aerator:** Using top grade Aerator, integrating water saving and water flow.

**Fasteners:** All using Stainless Steel
